

Satelite radio is a necessary alternative to the crap put out by the big radio stations. At a time when you have relaxed laws allowing a few people to control most of the media content and therefore the Ideas and opinions that reach the people of the US, it is dispicable to think that you would make it harder still for we the peolple to make coices and hear varying opinions or better yet to listen to radio that doesnt present us with opinions and feed us crap. Do yoor jobs look out for thebest interests of the people support freedom and choice not the broadcasters
